The dataset describes the posts published on Reddit in October 2022.

It contains two tables:

- fact_daily_posts (**Post_id**, Publisher_id, comm_num, score, creation_date, content)
- dim_publishers (**Publisher_id,** name, city)

fact_daily_posts :
Post_id: the identifier of the post
Publisher_id: the id of the publisher that writes the post
comm_num: the number of comments
score: the score of the post
creation_date: the creation date of the post
content: the content of the post

dim_publishers:
Publisher_id: the id of the publisher
name: the name of the publisher
city: the city of the publisher

SQL Questions

`Easy` Ranking of cities

- Find the fourth and fifth cities with the most posts

`Medium` Last post from top publisher

- Find the name and the content of the last post published by the top publisher (who has the most posts)

`Medium` Ascending scores

- Find the name of the publisher who has at least 5 posts and with an increasing score over time (the score of any post is strictly superior to the last post's score)

`Hard` One week interval

- Find the number of publishers that have at least 3 posts where every two consecutive posts are separated by at least one week

Hints
1) Virginia and Florida
2) 4 publishers
3) Teresa Good
4) 37
